Free Access to Atom Home Learning Platform

Dear Parents and Carers

We have been given a fantastic opportunity for your child to have access to Atom Home learning. This has been provided to us by Skipton Girls' High School. Atom Home is an online platform that supports KS2 learning through practice questions, video tutorials, and mock tests. While it is not designed to coach children for the entrance test for grammar school, it can help reinforce classroom learning and build confidence with KS2 objectives. Where relevant, it may also help familiarise children with the style of questions they might encounter in entrance exams.

The cost of this would normally be £575.90 so this is a great opportunity to support their learning at home, even if you are not considering applying for a grammar school place.

If you would like your child to benefit from this opportunity, please complete the form here: <https://atomlearning.com/pupil-premium/sghs>

Once you have done this, we will be asked to confirm your child's eligibility and then you will receive log in details for your child.

If you have any questions, please contact myself for more information.

Thank you for your continued support.

Mrs. J Bradley

Deputy headteacher

Where family and learning unite

respect • appreciation • honesty • kindness • perseverance
